A technical sheet with all products is also available.

The height of the cushions may swing of upto +/- 4 % due to the particular working operations of the raw materail.  
Products misurements are available in a separate technical data sheet.

**Flat spot, ovalized tyres? Never again!**

The present contents is not to be considered legally binding as the manufacturer constantly develops and improves his products and reserves himself the right to modify them without any forewarning and to his unchallengeable appreciation.  
Warranty: 12 months from the date of purchase against any manufacturing defect. In case, the defect is ascertained by its Quality Bureau, the manufacturer will provide to repair or exchange the goods, this to its own appreciation, excluding, since now, any responsibility nor any other compensation's form in regards to any direct or indirect damage due to the eventual defect; unless what is already established by the Swiss Civilian Code. In case of controversy, the competent place of jurisdiction is Lugo (RA) Italy.  
The ALCAIREGO tyre cushions sets do not require any particular attention during its use; driving only slowly up and down the cushions. In case of cleaning, please refer carefully to the manufacturer's instructions included in the original packaging.

## ALTairEGO tyre cushions sets

When storing or parking a vehicle for a long period (even 5 days only depending on the car's model) the flat spot or the well known ovalization of the tyres, occurs. During longer parking periods, the only weight of the car can crack the tyres.

Flat spot occurs on any car, in many forms and circumstances even for example by just leaving your sportscar unused during the week only; even more frequently on low sidewalls' tyres rated 25-50 % but also to other tyres even with sidewalls' height 70/75 % of the width and either during Summer and Winter time.

The most evident reasons are the tyres' height sidewalls (low ratio) and difference between ground and tyres temperature.

When flat spot occurs it is already too late and that obliges to replace all the four tyres

### To avoid this situation, just use one ALTairEGO tyre cushions set !

**ALTairEGO** is manufactured with a very special polyurethane foam specific to the product. Internally, and to allow that the cushions remain perfectly flat and do not move when one vehicle climbs i or descends them, a special composite material slab is inserted. Once positioned, the **ALTairEGO** tyre cushions remain there and once you return you find them where they have been left. Just climb on them and park your car.

The cushions and its special material insulate and sustain perfectly the shape of your car's tyres; front and rear ones, even of different size. Rear ones are often bigger! If you change car with different tyres ! and even if you drive a runabout during the week and a Supercar with substantial different tyres sizes on the week-end!

Due to its particularly generous sizes the **ALTairEGO** tyre cushions privileges the ease of use allowing its utilization without external help.

Keep in mind and follow the 2 steps described below.

**ALTairEGO** is perfectly adapted indifferently for classic or collection cars, oldtimers, youngtimers, Sportscars, Supercars, SUV which are often unused and parked for unexpected long periods. It allows you to drive your car in the best and perfect conditions. All year long!

**ALTairEGO** is the only product which support the tyres' sidewalls and though avoid cracked tyres.

Do not over-inflate tyres (popular belief) even if you leave your car on the tyre cushions for very long periods.

Just control and maintain the O.E.M. tyre pressure.

**The ALTairEGO tyre cushions has been developed in and is manufactured in Italy.**

**1** Place the **ALTairEGO** cushions before the wheels, double ramps before rear wheels. **Even when parking backwards, place cushions also as per design.**

**2** Drive and climb on the cushions and stop your car in their middle. **Then, always enter first double ramps cushions, forwards or backwards !**

**3 Relax!**

Next time, just drive out of the garage, without exiting your car! Upon your return, you will find the tyre cushions in the same position in which you have placed them initially. Just drive slowly and climb on the **ALTairEGO** tyre cushions, exit and close your car.

## Why choose ALTairEGO tyre cushions sets

**Avoid flat spots and cracked tyres like no other product!  
Insulate the tyres from the ground.**

**Encrease considerably the print of the tyres on the ground by driving inside the cushions.  
The only products which protects and sustains tyres sidewalls.**

**Just control, keep and maintain O.E.M. tyre pressure.**

**The average cost of 4 cushions ( 1 set) is roughly equivalent to the cost of only 1 tyre.**

**THEREFORE YOUR CAR IS ALWAYS READY TO GO AND IN PERFECT CONDITIONS.**

## When choosing ALTairEGO tyre cushions sets

**Always consider first, the weight of your car!**

**Refer to your car's official certificate (UK - mass in service) for its unladen, curb / kerb weight.**

**Then look after your car's tyres sizes; both front and rear ones!**

**Rear tyres are equal or often larger than front ones; unless very rare exceptions.**

**Choose tyre cushions within the models available inside the weight range in respect to your largest tyre sizes.**

## Very Important aspects

The most significant aspects to be considered with attention are the following:

- ■ ■ When cars are not used, driven daily or often left stored for quite long period, or for example when stored during winter time.
- When cars have tyres very low sidewalls (low coefficient), like 25-50
- When tyres reach high temperatures because they are driven intensively
- ■ ■ Once tyres have got flat spot, driving and handling conditions get badly hurt
- ■ ■ Because tyres replacement is very expensive! as you always have to replace all four tyres.
- ■ ■ When tyres get cracked, all four tyres also have to be replaced.

- SPORTSCARS
- VINTAGE/CLASSIC CARS
- ANY VEHICLE

**Using the ALTairEGO tyre cushions sets your car will always remain ready for a trip, in perfect conditions, at any time during the year and the years to come!**

**+ 400% OF SUPPORT BASE**

- **Print of the tyre inside an ALTairEGO tyre cushion**
- **Print of same tyre parked in the garage without cushion**
